NOMURA IT HELPDESK

General IT Knowledge Base — Aria Voice Agent Reference

1. EMAIL & OUTLOOK

Outlook Not Opening

1. Close Outlook completely from Task Manager (Ctrl + Shift + Esc)
2. Press Win + R → type outlook.exe /safe → press Enter
3. If opens in safe mode → disable add-ins → File → Options → Add-ins → Manage COM Add-ins → uncheck all → restart

■ **Still not opening → Messaging Team → P2**

Outlook Not Syncing / Emails Not Receiving

1. Check internet connection first
2. Click Send/Receive → Send/Receive All Folders
3. Check if Outlook is set to Work Offline → View tab → uncheck Work Offline
4. Remove and re-add account → File → Account Settings → select account → Remove → Add again

■ **Still not syncing → Messaging Team → P2**

Emails Stuck in Outbox

1. Check attachment size — Nomura limit is 25MB
2. Delete the stuck email from Outbox folder
3. Restart Outlook and retry with a smaller attachment

■ **Persists without large attachments → Messaging Team → P2**

Outlook Password Keeps Asking

1. Go to Control Panel → Credential Manager → Windows Credentials
2. Find Microsoft Office entries → Remove them
3. Restart Outlook → sign in fresh with Nomura credentials

■ **Still prompting → Identity and Access Management → P2**

Emails Going to Junk / Spam

1. Check Junk Email folder
2. Right click email → Mark as Not Junk
3. Add sender to Safe Senders → Home → Junk → Junk Email Options → Safe Senders → Add

■ **Consistently going to junk → Messaging Team → P3**

2. MICROSOFT TEAMS

Teams Not Loading / Stuck on Loading Screen

1. Close Teams completely from Task Manager
2. Press Win + R → type %appdata%\Microsoft\Teams → delete the Cache folder
3. Restart Teams

■ **Still not loading → Messaging Team → P2**

Teams Calls Dropping or Poor Audio

1. Check internet — minimum 2 Mbps required for Teams calls
2. Close other bandwidth-heavy applications
3. Teams → Settings → Devices → check correct microphone and speaker selected
4. Try Teams on browser at teams.microsoft.com as a test

■ **Still dropping → Network Team → P2**

Cannot Join a Teams Meeting

1. Check if meeting link has expired
2. Try joining from browser instead of app
3. Clear Teams cache (see steps above)

■ **Still cannot join → Messaging Team → P2**

Teams Status Stuck on Away or Offline

1. Click profile picture → set status manually to Available
2. Settings → Privacy → toggle Read receipts off and on
3. Sign out and sign back in

■ **Still stuck → Messaging Team → P3**

3. VPN

VPN Not Connecting

1. Check internet connection works without VPN first
2. Close VPN client completely and reopen
3. Try disconnecting and reconnecting
4. Restart the device and try again
5. Check if VPN credentials expired — reset password if needed

■ **Still not connecting → Network Team → P2**

VPN Connects but Cannot Access Internal Resources

1. Disconnect and reconnect VPN
2. Clear DNS cache → open Command Prompt → type ipconfig /flushdns
3. Try accessing resource by IP instead of hostname

■ **Still cannot access → Network Team → P2**

VPN Disconnects Frequently

1. Check internet stability — run speedtest.net
2. Change VPN server if multiple options available
3. Disable battery saver mode — it can interrupt VPN
4. If on WiFi — try switching to ethernet

■ **Still disconnecting → Network Team → P2**

4. INTERNET & NETWORK

No Internet Access in Office

1. Check if ethernet cable is properly plugged in
2. Try a different ethernet port on the desk
3. Restart the device
4. Check if colleagues in same area have internet — if yes, isolated issue

■ **Completely blocked → Network Team → P1**

Slow Internet in Office

1. Close unused browser tabs and applications
2. Disconnect from VPN temporarily to test speed
3. Run speedtest.net — expected minimum 50 Mbps on office network

■ **Below 10 Mbps → Network Team → P2**

WiFi Not Showing Nomura Network

1. Turn WiFi off and on again
2. Forget the Nomura network and reconnect
3. Check if device is on approved device list — unregistered devices cannot connect

■ **Still not showing → Network Team → P2**

Cannot Access Specific Website or Internal Portal

1. Check if site is blocked by Nomura firewall — some sites are restricted by policy
2. Try on a different browser
3. Clear browser cache → Ctrl + Shift + Delete → clear all
4. If internal portal → check if VPN is connected

■ **Still blocked and should be accessible → Network Team → P3**

5. LAPTOP & HARDWARE

Laptop Running Slow

1. Restart the laptop — do not just close the lid
2. Close unused applications and browser tabs
3. Check Task Manager → Ctrl + Shift + Esc → look for high CPU or memory usage

4. If one application using high CPU → force close it
5. Check if Windows Update is running in background — let it complete

■ **Still slow after restart → End User Computing → P3**

Laptop Screen Flickering

1. Right click Desktop → Display Settings → change refresh rate to 60Hz
2. Update display driver → Device Manager → Display Adapters → Update Driver
3. Try connecting external monitor to isolate issue

■ **Still flickering → End User Computing → P2**

Laptop Not Charging

1. Check if power cable is properly connected at both ends
2. Try a different power outlet
3. Remove and reinsert the battery if removable

■ *Do not raise P3 for this — raise P2 immediately as employee cannot work if battery dies*

■ **Not charging → End User Computing → P2**

External Monitor Not Detected

1. Check cable connection at both ends
2. Try a different cable or port
3. Right click Desktop → Display Settings → Detect
4. Press Win + P → select Extend or Duplicate

■ **Still not detected → End User Computing → P3**

Keyboard or Mouse Not Working

1. Check USB connection — try a different USB port
2. For wireless — replace batteries or recharge
3. Restart the device
4. Try the device on another computer to confirm if hardware fault

■ **Hardware fault confirmed → End User Computing → P3**

6. ACCESS & PERMISSIONS

Cannot Access a Shared Drive or Folder

1. Check if you are connected to VPN — required for shared drives
2. Try accessing by full UNC path e.g. \\servername\foldername
3. Check with your manager if you should have access

■ **Should have access but blocked → Identity and Access Management → P3**

Cannot Access an Internal Application

1. Check if VPN is connected
2. Try clearing browser cache and cookies

3. Try a different browser
4. Check if your account has the required role or license

■ **Access needed and confirmed by manager → Identity and Access Management → P3**

Multi-Factor Authentication (MFA) Not Working

1. Check if authenticator app is showing correct time — time sync issues cause MFA failures
2. Try the Nomura authenticator app → Refresh codes
3. Use backup codes if available
4. If phone number changed → cannot self-serve — must escalate

■ **MFA completely locked out → Identity and Access Management → P1**

7. PRINTERS

Cannot Print — Printer Offline

1. Check if printer is powered on and connected to network
2. On laptop → Settings → Printers and Scanners → select printer → Open Queue → clear all jobs
3. Right click printer → See What's Printing → Printer → uncheck Use Printer Offline
4. Restart the print spooler → press Win + R → type services.msc → find Print Spooler → Restart

■ **Still offline → End User Computing → P3**

Print Jobs Stuck in Queue

1. Open print queue → cancel all pending jobs
2. Restart Print Spooler service (see above)
3. Delete files in C:\Windows\System32\spool\PRINTERS
4. Restart printer and try again

■ **Still stuck → End User Computing → P3**

8. TICKET PRIORITY & SLA REFERENCE

Priority	Description	SLA	Assignment Group
P1	Employee completely cannot work	1 hour	Relevant team
P2	Major disruption, partially working	4 hours	Relevant team
P3	Minor issue, workaround available	Next business day	Relevant team

Assignment Group Reference:

Issue Type	Assignment Group
Email, Outlook, Teams, Slack	Messaging Team
VPN, WiFi, Internet, Network	Network Team

Laptop, Printer, Monitor, Hardware	End User Computing
Access, Permissions, MFA, Accounts	Identity and Access Management
Unknown or general IT issues	IT Service Desk
